Americans for Homeopathy Choice is asking our help.

I don't know if you are already aware of the Petition in the US to help protect consumer freedom to choose homeopathy?

If not, the group that is spearheading this petition is Americans for Homeopathy Choice (<https://homeopathychoice.org/>), if you'd like more info.

Although the petition is in the US, electronic signatures from around the world are welcome. Apparently, the FDA is looking at possibly banning certain remedies, which then would limit consumers' choice, especially when it is pretty important in homeopathy to use the correct remedy for the appropriate symptoms/conditions.

(We need to be united because this situation now is global..is happening in Australia, United Kingdom, United States...and we do not want to happen in Canada.)

Interview with Jan Scholten: Information about radionics, limitations of proving, the future of homeopathy and more. (Part 3). In the link you have access to part 1 and 2. [Interview with J Scholten](#)
